Bosch Dishwashers: Flexibility and Performance

Bosch dishwashers are known for Quietness, Quality and Efficiency.

3rd Rack adds capacity and improves ease of use:

- 3rd rack adds 30% more capacity when compared to a 2 rack Bosch dishwasher.
- Dedicated rotating spray nozzle ensures proper cleaning even with heavily soiled items.
- V-shape is perfect for silverware but also for small dishes and larger cutlery items.
- The additional silverware basket can be placed anywhere in the dishwasher.

Detergent Tray:

- Dispenser allows detergent to drop into the tray
- Spray jets are precisely aimed at the tray to dissolve detergent evenly and reduces noise by the jets not spraying the inner door of the dishwasher.
- Minimizes noise and boosts performance.

New RackMatic™ System:

- Adjust the upper rack in one step, even when loaded; three different heights allows for up to 9 rack positions
- Our racks are designed to fit mixed loads of pots, pans and dishes, allowing for easy cleanup without any hand washing.
- Removable silverware basket can be placed anywhere in the dishwasher, offering ultimate flexibility.

Understanding Condensation Drying...

How it works:

- The hot final rinse heats the dishes.
- The remnant heat evaporates the droplets on the dishes.
- Water condensates on colder tub walls.
- This flows to the sump and is pumped out

Benefits:

- No risk of melting plastic in the bottom rack.
- Efficient use of final rinse heat.
- Extremely sanitary

Optimizing the Drying:

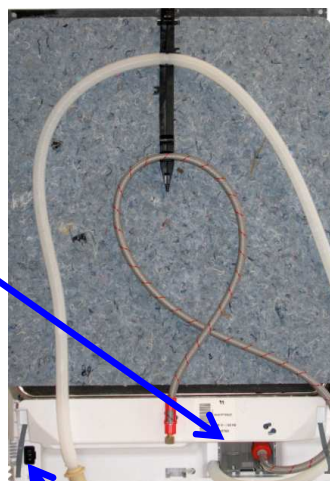

- Use a rinse agent, use the auto cycle & use the sanitize option

New & Improved Bosch Dishwasher Installation – 300, 500 & 800 Series
